## About Herbs

# REASONS TO WORK WITH USON

We have been harvesting medicinal wild plants for 10 years. Our harvest area is the Republic of Moldova. We understand the plants we work with.

Each species is harvested at its prime stage of development in a way that has a minimal impact on future plant populations. Each herb has a harvest season (see our price list below). Please order before the harvest season starts. We will harvest and ship your herbs when they are ready. We sometimes have a few dried herbs in stock; see the list below.
